

## Who can work in Sweden?

If you are enrolled at a Swedish university or university college you can work in Sweden without a work permit (enclosing site). You do, however, need a residence permit. Nordic, EU and EEA students need to get a residence permit if they are staying in Sweden for longer than three months. All other nationalities need to get a residence permit before they arrive in Sweden.

For information on obtaining a residence permit, contact your nearest embassy or consulate or the Swedish Migration Board directly.
